

DATA SHEET

# DON'T LET ICE MELT CHEMICALS DULL YOUR BEAUTIFUL FLOORS

# KE-26D

## MOP WITH KE-26D RINSE AID & PH NEUTRALIZER

and your floors can be as beautiful in the winter as they are in the summer

**FLOORS LOOK BETTER:** Eliminates the white film from ice melt chemicals that deposit at entranceways and tracks over other flooring and carpets.

**FINISHES (AND FLOORS) LAST LONGER:** Ice melt chemicals attack floor polishes to dull their gloss and necessitate premature stripping and recoating.

**EASY TO USE:** Just mop on and mop off. No need

for scrubbing. Works like magic in one application.

**SAVES LABOR:** A few cents worth of Winterinse does the job better than many dollars worth of hard work.

**REDUCES SLIP HAZARDS:** Wet floors are more slippery .. and floors covered with ice melt film stay wet longer because the compounds are hygroscopic and hold water.

### SEE HOW EASILY **KE-26D** NEUTRALIZES ICE MELT CHEMICALS

Fill jar with water, add 1 or 2 pellets of ice melt, replace cap and shake. The residue of this solution is bad enough on your floor, but ...

Look what happens when you try to remove the film with an ordinary cleaner ... Squirt a stream of cleaner into the dissolved ice melt.

Note the sticky coagulate produced by the mixture of ice melt and cleaner. This is what dries to such a hard to remove film on your floors.

Now see how easily this compound can be neutralized ... Squirt a stream of Winterinse into the jar — and like magic ...

The solution becomes perfectly clear again... You can see how easily ice melt film can be removed, leaving your floors sparkling clean.
