

KE-37

WET / DRY SURFACE ROOF CEMENT

Adheres to Roofing, Concrete,
Masonry & Metal
Excellent For Patching

- * Apply in any Weather
- * Long Wearing
- * Adheres to Roofing
- * Remains Flexible
- * Seals Leaks

Features

- Adheres to Both Wet and Dry Surfaces.
KE-37 applies easily in hot or cold weather and stays where you put it.
- Repairs Cracks, Bulges and Blisters.
Closes seams and tears in roof surfaces. Stops leaks around skylights, vent spouts, valleys, gutters and chimneys.
- Heavily Plasticized for Extreme Durability.
KE-37 stays flexible and pliable longer due to its exceptionally strong resistance to stress.
- Ideal for Emergency Repairs.
KE-37 is easily applied in any weather - hot, cold, wet or dry, and seals leaks instantly.
- Builds its Own Reinforcing Mat.
Contains long fiberglass fibers for reinforcement. No other reinforcing membranes are usually needed.
