## ALL NATURAL HEAVY DUTY CLEANER & SEWER DEGREASER

---

For use as a floating lift station degreaser, see reverse side of this sheet.

### ● GENERAL INDUSTRIAL APPLICATIONS

Rapidly penetrates and lifts the widest range of petroleum, animal and vegetable based oils, fats, and greases.

### ● ALL PURPOSE CLEANER

... designed to meet today's demands for an easy-to-use liquid degreaser -- a solvent cleaning agent, free of chlorinated solvents, providing environmental safety plus superior solvent degreasing efficiency.

### ● POWERFUL ALL-PURPOSE CLEANER - DEGREASER

Especially formulated for the medium to heavy duty maintenance cleaning jobs in plants and buildings where a single general purpose product is required..

### ● SUPER CONCENTRATED LIQUID CLEANER

For floor and other cleaning, which is adaptable by dilution, to any degree of soilage.

### ● CITRUS BASED

A refreshing fragrance lingers while the citrus terpenes do the cleaning. Nonflammable. Free rinsing. Phosphate free. Dilutes with hot or cold water.

### ● ECONOMICAL & EASY TO USE

May be used to clean automotive parts, engine housings, transmissions and any washable surface in the plant or office..

## **ALL NATURAL FLOATING LIFT STATION DEGREASER**

### **DESCRIPTION**

This powerful degreaser is designed to quickly dissolve heavy grease and fat accumulation in lift stations. The special Limonene solvent dissolves the toughest build-ups quickly and remains floating on the water surface for extended degreasing action. The all-natural formula can be used with complete assurance that no petroleum solvents are entering the water system. The pleasant orange fragrance is not perfume, but actual odor-absorbing power to keep noxious sewer odors to a minimum. This product will not disrupt bacterial action in any treatment process.

### **FORMULATION:**

Contains 100% all-natural Limonene solvent and odor-neutralizing agent.  
**ENVIRONMENTALLY SAFE** — contains no petroleum distillates.

### **APPLICATION:**

As a floating degreaser in lift stations, add ½ gallon for each square foot of water surface. This will form a thin layer of cleaner that will strip grease off the walls as the water level rises and falls. At this usage rate, it will also dissolve floating grease balls and accumulations from pumping equipment.

This product contains non-emulsifiers, so the floating layer of cleaner will remain in action for hours or days for the most complete and economical performance.

### **SPECIFICATIONS:**

These specifications are typical, and subject to usual manufacturing tolerances.

Form .....	Liquid
Color .....	CLEAR
Specific Gravity .....	0.841
Flash Point (ASTM-D-3278) .....	122°F
Storage Stability (at 70°F) .....	Indefinite
Clarity .....	Clear
Odor .....	Citrus
pH .....	N/A
Solubility (In water) .....	Insoluble
