 - Schools
 - Veterinarians & Zoos
 - Medical Facilities
 - Money Handlers - (banks, cashiers)
 - Dentists
 - Police Departments
 - Portable Johns
 - Mortuary and Funeral Homes
 - Delivery Vehicles

Dermagel is an excellent deterrent to airborne and contact diseases.

When used properly, it causes rapid, broad-spectrum reduction of pathogenic microorganisms.

Moisturizing

Dermagel is not a soap; it is a mild, bactericidal gel that is very effective against germs. It reduces the risk of cross infection.

Dermagel contains emollients that slow down the skin's loss of moisture and reduces the loss of natural skin lubricants. Alcohol, excellent at killing germs, used excessively can be drying, but **Dermagel** contains dimethicone, opacifier, vitamin E and aloe to combat dryness.

Dermagel is fast and easy to use. No water is required, no towels, no air dryers. Just dispense a few drops into the hands and rub gently for 15 seconds until the hands are dry. When dry, hands will have a soft, pliable and smooth feel.

TECHNICAL INFORMATION	
NON-TOXIC: (at 3gm/kg as defined by Federal Hazardous Substance Act 15 CFR1500.)	
Meets USDA Protocol for Chlorine equivalency.	
	<i>Sodium Hypochlorite equivalency ppm as available chlorine</i>
<i>Organism</i>	<i>% Reduction</i>
Staphylococcus aureus	>200 ppm
Salmonella typhosa	>200 ppm
¹ Antimicrobial Efficacy (Summary):	
	<i>Percent Reduction of Bacteria @ 15 seconds</i>
<i>Organism</i>	<i>% Reduction</i>
Escherichia coli	99.50%
Serratia marcescens	99.95%
Staphylococcus aureus	99.99%
Listeria monocytogenes	99.99%
Salmonella typhimurium	99.60%
Pseudomonas aeruginosa	99.90%
Streptococcus pyogenes	99.91%
	<i>Virus inactivation @30 seconds</i>
<i>Organism</i>	<i>% Reduction</i>
Herpes simplex 1	99.97%
