DUMPSTER DAISY

Geraniol Insect Repellent Products

Dumpster Deodorizer

Dumpster Deodorizer:

Do you have a trash collection area that may contain odors or insects that are offensive to your customers or neighbors? We can help with the **Daisy** Dumpster Deodorant. This specially formulated dry product can help you eliminate smelly odors for just pennies a day. This product is made with non-hazardous materials using naturally based ingredients as well as an all-natural insect repellent-Geraniol. Dumpster Deodorant uses ground corncob as the base material and in addition to being completely safe it provides everyone with significant benefits. Corncob is very absorbent so it tends to hold more of the odor killers and insect repellent than other brands on the market that use rock as a base. Also, corncob is much lighter than rock so it cuts down on shipping costs. Corncob is a biodegradable material so when it finally reaches the dump it does not add waste but degrades in the soil. **Daisy** Dumpster Deodorant provides the combination of odor killers and insect repellents you need to keep your trash exactly how you want it – unnoticed!

Applications:

Great for use in and around Dumpsters and trashcans, livestock bedding, playgrounds and picnic areas.
