PEAT SAFE is nonleaching and is effective on land or water.

PEAT SAFE is nonabrasive and is safe around metal, plastic and rubber parts. **PEAT SAFE** will effectively suppress vapors. **PEAT SAFE** can be either incinerated or disposed of in a landfill.

PEAT SAFE is used in factories, ships, transportation facilities, ports, refineries, garages, fire departments, remediation projects, boat and golf courses.

Product must be disposed according to Federal, State and Local Regulations. Contact local Authorities for complete information.

Directions For Use:

Spread Peat Safe sparingly over the spill. Peat Safe will Darken as it absorbs the liquid.

Once the spill is completely absorbed, it can be swept up and placed in a container for disposal.

Each bag contains 4 cubic feet of product and
Absorbs 26 to 34 gallons.

PEAT SAFE should not be used to absorb strong acids or oxidizers

INGREDIENTS: Sphagnum Peat Moss
