Jelled Air Freshener for long lasting fragrance

SPRAY-A-JELLS

Spray-A-Jells are truly a break through in an innovative, long lasting air freshener that gives the benefits of a fan cabinet and gel cup, without the cost, maintenance or risk of vandalism. Spray-A-Jells are ideal for use in high traffic areas where a long lasting fragrance is desirable. Spray in an area early in the morning and still have excellent air freshening late in the day, or even the next couple of days, depending on the size area being treated. Traditional air freshening sprays are thin and float with the air. As air flow carries them away, so goes the air freshener. Not Spray-A-Jell, the jelled fragrance slowly evaporates producing a long lasting, pleasant fragrance for many applications.

Trash Cans are an deal Application!

When replacing can liners, give them a shot of your favorite fragrance Spray-A-Jell. The jell will linger in the trash container, and provide whole room air freshening for hours. Under sink compartments have a much better and cleaner fragrance everytime the trash door is opened. Or, use in garbage can lids to provide a pleasant fragrance when the lid is remove.

Use under sinks or behind commodes in restrooms, road side rest stops, locker rooms or schools. Ideal for use in Health Care, Day Care, Lodging or Schools. When used properly, there is no messy jell or clean up problems.

LONG LASTING FRAGRANCES

Hampers provide a perfect place to use Spray-A-Jell!

Hampers in Health Care or Day Care centers are excellent applications for Spray-A-Jells. Also use in portable toilets, campers or boats to improve stale, musty odors.
