POWDERED SEWER TRACING DYE

*Fluorescent
Yellow / Green Color
Biodegradable & Non-Polluting*

This highly concentrated sewer tracing dye is formulated for use in all types of sewer flow studies and pollution investigations. It creates an intense fluorescent yellow/green color for maximum visibility under a wide variety of conditions

The dye contains biodegradable, non-toxic ingredients. When used at the proper dilutions, it is harmless to wildlife, and will not affect the operation of sewer treatment processes. Non-natural fluorescent color promotes safe use and aids in controlling public reactions.

Suggested Uses:

***Flow Origination
Infiltration Studies
Septic System Inspections
Time-Of-Use Studies
Pollution Investigations
Maintenance Analysis***

Apply dye as required for proper study of flow. One Pound will impart visible color to approximately 10,000 gallons of water.
