

KE-152GEL

GELLED DEODORANT BLOCK

SEWER ODOR CONTROL

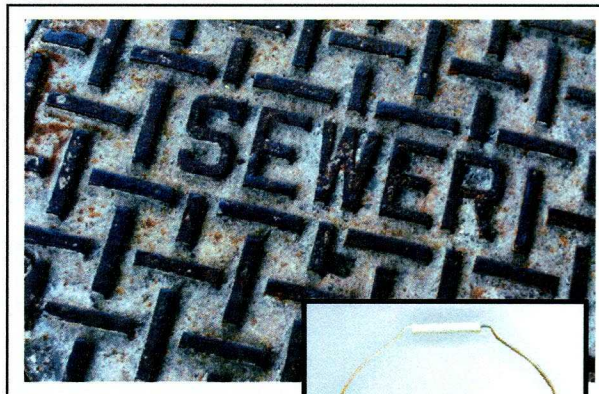

Product Description: KE-152GEL

specially designed to eliminate many sulphurous odors and amine odors as well as odors due to chemical decomposition. To assure optimal performance of this product under the toughest conditions, it has been produced and blended together with "high potency" humectants, activated charcoal, and reagents. The activated charcoal not only control malodors but literally "draws" them in to neutralize it.

These blocks are an ideal replacement for para odor blocks, offering a safer and healthier alternative.

Directions: To eliminate sewer odors remove lid from pail and suspend by handle at least 2 feet from manhole cover. Replace as necessary.

When used as directed, **KE-152GEL** is safe for people, clothing and the environment. This product is non-toxic, non-flammable and is approved for continuous use.
