

Understanding Green Seal & U.S. EPA Design for the Environment

One more step in helping the environment by offering safer alternatives to standard janitorial cleaning systems and programs. Reducing toxicity by eliminating common industrial chemicals is extremely important both for the user and the environment. Our green seal and Dfe certified products CONTAIN NO ACIDS, ALCOHOL, AMINES, AMMONIA, CAUSTIC, CHLORINE BLEACH, GLYCOL ETHERS, PHOSPHATES, QUATERNARY AMMONIUM COMPOUNDS, DYES OR PERFUMES.

Kinzua Environmental, Inc. is dedicated to creating healthier, more productive indoor environments with lower burdens on our natural resources, while providing products that work. Our commitment to Green Cleaning is more than our business, it is our mission to transform the cleaning industry. Our program offers safer alternatives to standard cleaning systems and programs by reducing indoor air toxicities and eliminating harsh industrial chemicals. Kinzua Environmental, Inc. cares about the choices we make in cleaning products, equipment, systems and procedures because they affect our economy and our very lives.

The Green Seal and EPA Dfe certifications are awarded to products that have less impact on the environment and work well.

To earn the Green Seal or EPA Dfe certification, a product must meet the environmental standards for the category as demonstrated by rigorous evaluation and testing.

Environmental Standards:

- Non-Toxic
- Contain no phosphates, EDTA or NTA
- Non-corrosive
- Non-combustible
- Contain no ozone depleting compounds
- Contain no known carcinogens
- Contain no chlorine bleach

Environmental Standards:

- Contain no butoxyethanol
- Contain no petroleum distillates
- Concentrated for use in cold water
- Safe VOC level when diluted
- Floor care products are slip resistant
- Floor care products contain no metal
- Cross-linked polymers
